Prof. Hsiao, Darn-Horng, Ph.D.
Department of Civil Engineering, National Kaohsiung University of Sciences and Technology
415, Chien-Kung Road, Kaohsiung, Taiwan 807618, ROC
Phone: +886-7-3814526 ext. 15259
E-mail：hsiaodh@nkust.edu.tw
Research Field: Sustainability for Geotechnical Engineering, Earthquake Disaster Prevention, Slope and Debris Disaster Prevention, Liquefaction, Risk Analysis, Ground Improvement, Soil and water conservation
PE: Professional Engineer of Civil Engineering, and Geotechnical Engineering at Taiwan
Education: PhD in Civil Engineering Department, 1996

Prof. Hsiao received academic degrees from B.S. in Civil Engineering at 1981, M.S. in Geotechnical Engineering Group at 1983, and Ph.D. in Civil Engineering at 1996 respectively (National Cheng-kung University, Tainan, Taiwan). He has worked almost 39 years at Department of Civil Engineering, National Kaohsiung University of Sciences and Technology. He also earned the Outstanding Teaching Award (2007) and Outstanding Class Teacher Award (2006). Since joining the University, Prof. Hsiao has worked over 50 research projects, received four patents, and wrote more than 100 academic papers and professional plan reports from various fields, including pipeline analysis in seismic, soil liquefaction, slope stability and soil debris, risk analysis, and soil improvement, including case study in the site, laboratory and numerical researches. In order to obtain the experiences in the field, he also achieved Professional Engineer of Civil Engineering, and Geotechnical Engineering in Taiwan. In the past, Prof. Hsiao has served as a guest editor of special issues of Sustainability (2022).
